

# Reversible Sun Hat

by

Jennifer Tryon

## Step 1

Iron fusible interfacing onto the back of both fabric prints.

## Step 2

Trace an equal number of pattern pieces on both prints. The number of pieces needed is printed on each pattern piece. Note if the piece needs to be cut on fold. Cut out all pieces

## Step 3

With Inner and Outer Fabrics

- pair up two of the three brim pieces, and sew right sides together along one end. Press seam open. Sew remaining brim piece, right sides together to each end of brim pieces, and complete the circle.

## Step 4

With right sides together line up seams on brim with seams on crown's larger end. Pin and sew around circumference.

## Step 5

Pin crown's smaller end to top circle piece with right sides together and sew around circumference. Lots of pins will help. Press seams open.

## Step 6

You'll now have what looks like two hats, with right sides together, put one side inside the other and mark a 2 inch space to leave open.

## Step 7

Mark a 2-inch space along the brim to leave open for turning rightside out. Sew a 3/8ths inch seam allowance around the wrong sides of brim. Don't sew over the 2-inch opening.

## Step 8

Turn hat right side out. Be sure all seams are pushed out. Turn the 2-inch opening inward and press. Press entire brim. Topstitch directly around the edge of the brim. Optional, space out additional top stitching rows 1/4inch apart inward toward the crown. The more top stitching, the stiffer the brim will be. Press entire hat. Ta-da! it's now reversible!
